

top no-slip wall, $\tilde{\nu} = 0$

periodic pair in the streamwise direction

pressure-driven periodic
turbulent channel

$Re_H \approx 20,300, \quad y^+ \approx 1$

left periodic
plane

$p_k = 2 \text{ Pa}$

right periodic
plane

$p_k = 0 \text{ Pa}$

$H = 2 \text{ m}$

profile line

$x = 0.5L$

bottom no-slip wall, $\tilde{\nu} = 0$

$L = 2 \text{ m}$
